

CARES Act & Elementary and Secondary School Emergency Relief Funding

CHALLENGE:

Planning for and coordinating during long-term closures, including how to provide technology for online learning to all students, how to provide guidance for carrying out requirements under IDEA and how to ensure other educational services can continue to be provided consistent with all Federal, State, and local requirements.

SOLUTION:

Hi.Ed helps districts and administrators connect with parents and students to ensure they are on track towards graduation and beyond. This is achieved through virtual guidance and everyone having access to their data. Hi.Ed allows educators to coordinate and document student interventions and supports.

CHALLENGE:

Purchasing educational technology (including hardware, software, and connectivity) for students who are served by the local educational agency that aids in regular and substantive educational interaction between students and their classroom instructors, including low-income students and students with disabilities, which may include assistive technology or adaptive equipment.

SOLUTION:

Hi.Ed provides educators with up to date Academic, and Benchmark Assessment data in one space. Hi.Ed provides classroom-level, school-level, and district-level reports that provide teachers and school leaders with individualized data they can use to improve their support for student performance. Hi.Ed's analytics provide results disaggregated by student characteristics including gender, race and ethnicity, and FRPL status.

CHALLENGE:

Activities to address the unique needs of low-income children or students, children with disabilities, English learners, racial and ethnic minorities, students experiencing homelessness, and foster care youth, including how outreach and service delivery will meet the needs of each population.

SOLUTION:

Hi.Ed allows educators to monitor and intervene on the academic, behavioral, attendance, social-emotional learning, and basic needs of all students served by the district, including the unique needs of the student groups named above. Hi.ED provides key insights for teachers and school leaders into gaps between student groups. Educators can view data breakdowns related to students' relative advantage, including race and ethnicity, Free or Reduced Lunch, English Language Learner, and other statuses, across each aspect of a student's achievement.
