

Title IV Funding

CHALLENGE:

Close the achievement gap between high- and low-performing children, especially the achievement gaps between disadvantaged children and their more advantaged peers.

SOLUTION:

Hi.Ed provides key insights for teachers and school leaders into gaps between student groups. Educators can view data breakdowns related to students' relative advantage, including race and ethnicity, FRPL status, English Language Learner, and other statuses, across each aspect of a student's achievement in school.

CHALLENGE:

Provide greater decision-making authority and flexibility to schools and teachers in exchange for greater responsibility for student performance.

SOLUTION:

Hi.Ed provides classroom-level, school-level, and district-level reports that provide teachers and school leaders with individualized data they can use to improve their support for student performance. Hi.Ed's analytics provide results disaggregated by student characteristics including gender, race and ethnicity, and FRPL status.
